01/04/2024 - Fondazione Bruno Kessler

Internship with the Language and Dialogue Technologies group on Natural Language Generation (NLG) topics. My work involves applying large language models to facilitate more effective communication during crisis events. The objective is to generate persuasive content while ensuring the factuality of the claims. In order to achieve this, a number of factors are taken into account, including the quality of the data and the training techniques employed. Advanced approaches, such as reinforcement learning, are also leveraged in this process.
